

Print-Management

& Billing System

PrintController

PrintController is a print-management, tracking & billing system for the enterprise and the small / medium business.

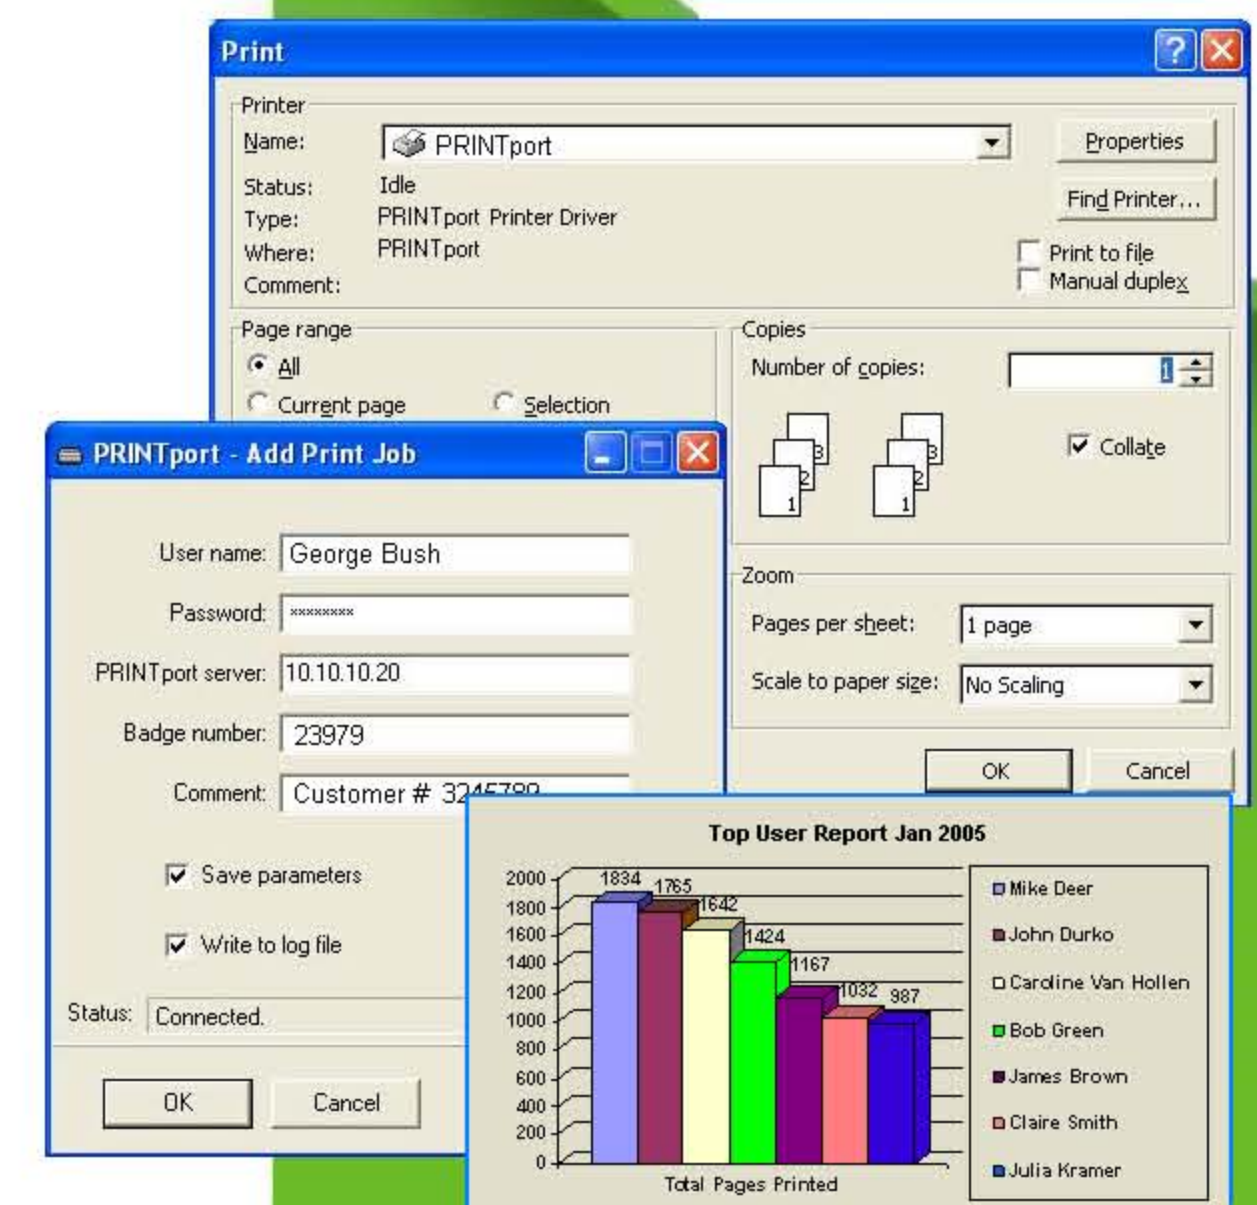

The flexibility of printer distribution and usage in today's office environment, contributes to an effective workflow, but it makes it difficult to track who is printing what, where, when, and why are they printing it.

PrintController is the ideal solution for control & billing. PrintController is a powerful print management and auditing system, providing the user with all the necessary tools to monitor, allocate, and optimize the printing costs.

Monitoring the print-server provides comprehensive real-time and statistical information on printer usage and the cost of printing - data that can be broken down according to the department, project, name or other ID of employee, printer and customer.

The data created can be utilize to optimize cost-efficiency of all the printing activities & to create print billing where needed.

PrintController is a print-management and billing system for the enterprise and the small business.

Manage your print jobs wisely

Color Management

A user needs to have permission on PrintController to print in color. PrintController has the ability to distinguish and track color and non-color printing for the same printer & within same printing job.

Billing Mechanism

"Comment" field at the Print dialog, allowing projects and customers detailed & customized billing.

Reporting Tools

Powerful report generator, based on any number of criteria and neatly summarizing printing activity.

Database Export

Export print usage data to external applications as csv, or any other custom formats.

System Architecture

Server based application; no installation on client PC is required.

User Training

No change in user's printing method - so no training is required.

Save Money

Eliminate Waste

Trace Color Printing

Efficiency

Control

Save Money and Take Control

PrintController report generator provides a powerful management tool to the enterprise management; it provides 3 different types of reports:

Billing Reports

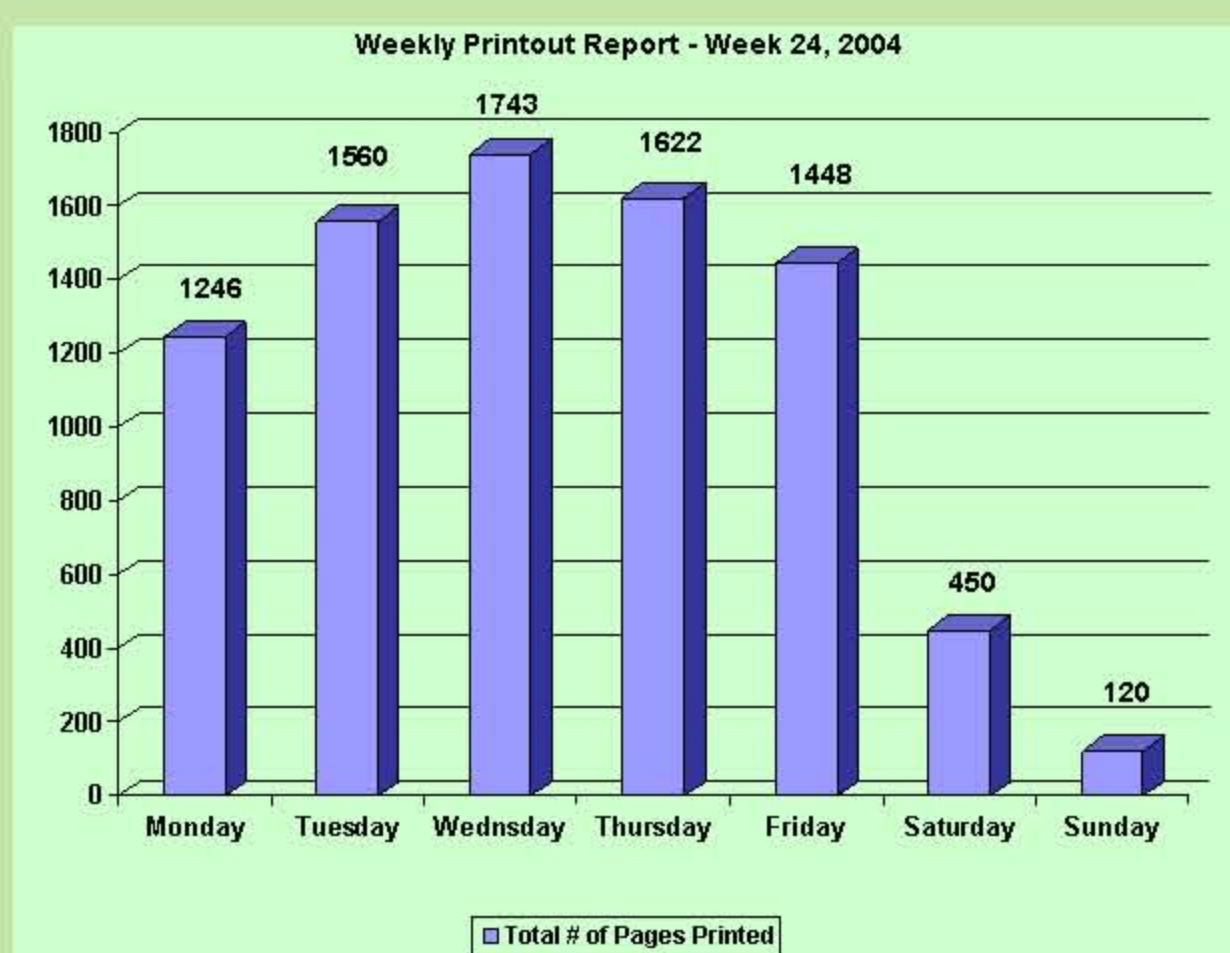

The billing reports can be sorted by User, Department, Job/ Printers, Project, Customer, Color Vs B&W printing, and paper type. In order to provide the user with flexible management reports, all the reports can be ranked and listed according to each of the parameters.

Time analysis reports

Time analysis reports provide the user with reports related to print loads within a defined time window; this can be a day, a week, a month, a quarter, and a year. These reports can help the customer streamline the print load balance, and increase the efficiency.

Failure analysis reports

The failure analysis reports provide the user with reports related to print failures within a defined time window. These reports help the customer analyze printer's downtime and levels of service.

Experienced Supplier of Universal Messaging Technology to Enterprises

Tyrexcell is an experienced, well-established supplier of enterprise fax and universal messaging solutions. Our customers range from large distributed user-base organizations to small workgroups, including government institutions, manufacturing companies, universities, financial institutions as well as service-oriented companies.

A Comprehensive Family of Universal Messaging Products

SecurePort - Protects leakage of confidential documents from the organization. It monitors and protects information sent out from any communication channel / port, such as e-mail, Internet chats, fax machines, printers, securing all possible data leaks.

PRINTport Enterprise - A secure enterprise print management system. PRINTport was designed for organizations that need a mechanism to control and secure print jobs on their public shared printers, provide billing information, and save money.

SMSport - Enables enterprise users and applications to send and receive messages "To" and "From" mobile phones, extending the mobile Short Message Service (SMS) into a robust business solution.

FAXport Connector for SAP / Oracle Application - Automates the delivery of mission critical documents by providing powerful electronic document delivery mechanism from ERP systems.

Xport & FAXport4HP - FAXport for Xerox & HP Multifunction office machines and LAN Scanners, enable users to access documents and send outbound faxes directly from the Xerox & HP devices.
