

Modem Pooling Software for Dial-Out Networking

Efficient, Cost-effective Shared Modem Access.

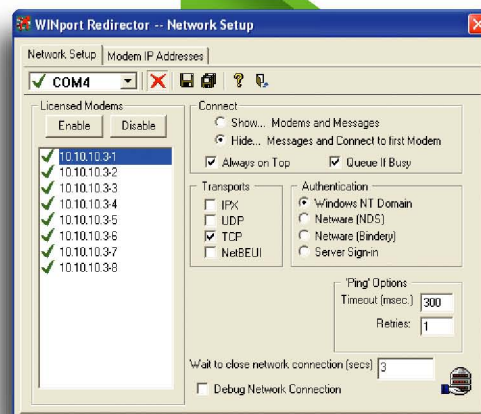

WINport Dial-Out Networking software provides cost-effective access to online services, and terminal applications through shared modems. By sharing these resources, organizations:

- Reduce network complexity
- Lower deployment costs
- Enhance security
- Minimize maintenance

Networks that employ modem ports or channels for inbound communication can share these resources using WINport.

When users dial out from the desktop, WINport dynamically connects them to the first available port. If all modems in the pool are busy, WINport prompts the user to queue for the next available modem. This entire operation is transparent to the user. There is nothing to change in the user's dial-out networking software or in any application.

WINport allows both large and small businesses to reduce their telecommunication costs through "shared modems"

User & Enterprises Benefit from WINport

WINport is Secure

Security is enhanced with WINport's assigned IEEE socket number that can be configured to allow safe data passage in a corporate Firewall environment. With WINport's privacy encryption, data traffic between Client and Server is secure.

WINport is Completely Transparent

It creates a virtual modem compatible with most existing dial-out networking software. Users anywhere on the network can access online services, remote offices, terminal applications, and other dial-up services quickly, easily, and transparently.

WINport Centralizes Control

Enables network administrators to monitor and report easily on the origin, destination, time, and duration of every call.

WINport is Scalable

Easily expands as the network grows. Start with a single shared modem port and grow to support hundreds of modems independent of brand names.

There is nothing to change in the user's dial-out networking software or in any application.

Industries throughout the world use WINport to increase efficiency

reseller in your area.

Technical Support

Departments rely on WINport to reach remote desktops

Law Firms

Share modems to get access to legal databases (Lexis-Nexis Westlaw, Quick-Law)

Financial Institutions

Get timely reports (on Mortgage rates, etc.) from proprietary dial-in networks

Travel Agencies

Log into reservation systems without the need for a leased line

Insurance

Companies can access proprietary networks (for information on motor vehicle licensing, driver records, etc.)

Banking

Bank branches use WINport in-lieu of Internet dial ups

MIS Departments

Manage remote users using a network shared WINport modem

Small-to-Medium-Sized Businesses

Use WINport when a high-speed Internet line is not accessible, or the connection is too costly

FTP

Use for file transfers

Experienced Supplier of Universal Messaging Technology to Enterprises

Tyrexcell is an experienced, well-established supplier of enterprise fax and universal messaging solutions. Our customers range from large distributed user-base organizations to small workgroups, including government institutions, manufacturing companies, universities, financial institutions as well as service-oriented companies.

A Comprehensive Family of Universal Messaging Products

- **SecurePort** - Protects leakage of confidential documents from the organization. It monitors and protects information sent out from any communication channel / port, such as e-mail, Internet chats, fax machines, printers, securing all possible data leaks.
- **PRINTport** - A secure enterprise print management system. PRINTport was designed for organizations that need a mechanism to control and secure print jobs on their public shared printers, provide billing information, and save money.
- **SMSport** - Enables enterprise users and applications to send and receive messages "To" and "From" mobile phones, extending the mobile Short Message Service (SMS) into a robust business solution.
- **FAXport Connector for SAP / Oracle Application** - Automates the delivery of mission critical documents by providing powerful electronic document delivery mechanism from ERP systems.
- **Xport & FAXport4HP** - FAXport for Xerox & HP Multifunction office machines and LAN Scanners, enable users to access documents and send outbound faxes directly from the Xerox & HP devices.
